

Info Document: Disaster Recovery

*Is your organisation prepared for
when disaster strikes?*

One Contact for All National Building Disaster Recovery Services

“All of the guys on site were superb, constantly ensuring we were happy with the work and progress throughout the day.”

Area Manager | Leisure Client

JCW's Emergency Disaster Response Team make sure our clients' businesses are back up and running - fast.

We understand no amount of preventative equipment maintenance can prevent disasters caused by nature. When gas, HVAC and electrical equipment are damaged through normal operations, repair is straight forward, the same cannot be said about unconventional breakdowns, i.e. damage by flood, fire or smoke.

After an unexpected disaster we can recover, restore and repair water or fire damaged internal fabric, HVAC, gas and electrical assets. We can stop further disruption to operations and the loss of revenue, make the workplace compliant and have employees back to work safely.

Our qualified engineers and disaster restorers are located nationwide, and aided by our management teams from 6 strategically located offices around the UK.

JCW can arrange for commercial disaster recovery, wherever our clients are.

Water Disaster

Fire Disaster

Emergency Response

Sectors

We provide Disaster Recovery services to a broad range of industries:

- Commercial Properties
- Public Sector Buildings
- Retail Premises
- Managed Offices
- Hotel and Leisure Facilities
- Insurance Companies

One Point of Contact

When disaster strikes, it can be difficult to know which recovery procedure to follow in the aftermath. As a contracted client of ours, JCW can be your **first** and **only point of contact** throughout the management of your crisis.

The first step towards getting businesses back up and running is the safe recovery of salvageable systems and equipment...

Specialist Technical Services

Fire, smoke and flood cause damage and the cleaning of damaged areas goes far beyond what just the eye can see. The proper restoration and decontamination in the aftermath of fire and flood to buildings is paramount to the health and safety of the public.

We are accredited for repair and maintenance services for HVAC, gas and electrical equipment and systems, we can ensure salvaged equipment is not only recovered and cleaned but also statutorily compliant to safe working standards.

The JCW multi-skilled disaster recovery team will repair and recommission systems, on top of the essential professional decontamination process to ensure HVAC, commercial gas and electrical systems are safe, compliant and performing correctly.

Be Compliant Again - Fast - with our Building Compliance Services

JCW will also observe and assess any damage that may have occurred in surrounding areas to your premises and report these to the relevant authorities. Damage such as downed power lines, blocked drains and burst pipes can pose a safety risk as well as cause the possibility of a secondary disaster.

What Makes Us Different

JCW Group has its own disaster recovery team that our clients have turned to for restoration and reconstruction services immediately following a disaster.

Our goal is to identify the priorities of each client, minimise both primary and secondary damage, whilst working as quickly as possible to get them back up and running.

What makes us different from other disaster recovery and restoration companies?

With our own employed labour and diverse skill sets for mechanical and electrical systems as well as all elements of building fabric, means we can offer a “one stop shop solution” for all trades.

Contact us now to find out how you can access our Disaster Recovery Team should disaster strike one of your buildings today.

Would you like to know more?

Sharing our industry expertise

As a specialist provider of mechanical and electrical maintenance and installation services we are a hub of industry knowledge and experience and are often asked for advice and guidance from our clients. We believe in giving added value to every customer, every visit and always go the extra mile. As part of our services we began to publish a range of useful eBooks for our customers, each providing information on legislation, compliance requirements and best and top on general good practice with regard to installations and asset maintenance.

We are delighted to share these with you, for free, all available in one area of our website. So, welcome to our new JCW Publications page.

We hope that our shared knowledge will help you be more proactive and preventative with regard to your building assets and that this in turn will help your company/business save time and money.

If you would like to be kept informed of when new eBooks become available, please subscribe by completing the form to the right and we will be sure to advise you when our next eBook is launched.

About JCW Energy Services Limited

We provide complete project management, installation, in house maintenance and tailored managed solutions to a broad range of clients across the UK.

We are a national mechanical and electrical building service provider, offering integrated planned preventative as well as reactive maintenance services across all property portfolios.

Although JCW Energy Services Limited in its current form is a relatively new company, the group has history within the industry dating back to 1903.

Today JCW is in a unique position where it not only employs nearly 200 dedicated staff but also can offer mechanical and electrical services with an equal amount of engineers within each discipline. This means that we can self deliver hard services nationally through our mobile engineering workforce as well as provide full project management and installation services through our network of six offices.

Our offices are strategically placed and take ownership of their areas customers to provide a fast, reliable, local service. Our engineers are fully qualified, have a wealth of experience, are accommodating and genuinely care about the work they conduct and the service they provide.
